**HAND
PROTECTION>>**

Medical Grade Disposable Nitrile Examination Gloves

Features

- Made of 100%high quality NBR, non-toxic and odorless
- No allergenic protein sources, lowering the risk of allergies
- Good resistance to bacterial penetration, acid, alkali, grease and chemicals
- Excellent tensile strength, elongation and conformability
- Touchscreen-compatible, flexible, sensitive and simple to use
- Finger texture/full texture for enhanced anti-slip performance
- Basic anti-static performance

Application

Medical care,medical testing,dental clinics,beauty institutions,veterinary hospitals, and other medical industries

Specifications

| Material | Texture | Specification | Size | Weight | Length | Packaging |
|----------|-----------------------------|---------------|--------|------------|-------------|-------------------------|
| Nitrile | Finger texture/full texture | Powder-free | XS-XXL | 3.0g-10.5g | 240mm-300mm | 100 pcs×10 boxes/carton |

Certification

EN 455 ASTM D6319 ASTM D6978 FDA21 CFR177:2600

Food Grade Disposable Nitrile Gloves

Features

- Certified for food safety in accordance with national standards
- Made of 100%high quality NBR, non-toxic and odorless
- No allergenic protein sources, lowering the risk of allergies
- Good resistance to bacterial penetration, acid, alkali grease and chemicals
- Excellent tensile strength, elongation and conformability
- Touchscreen-compatible, flexible, sensitive and simple to use
- Finger texture/full texture for enhanced anti-slip performance
- Basic anti-static performance

Application

Fruit and vegetable washing, food processing, cooking, food and beverage production and other catering industries

Specifications

| Material | Texture | Specification | Size | Weight | | Packaging |
|----------|-----------------------------|---------------|--------|------------|-------------|-------------------------|
| Nitrile | Finger texture/full texture | Powder-free | XS-XXL | 3.0g-10.5g | 240mm-300mm | 100 pcs×10 boxes/carton |

Certification EN 455 EN 374 ASTM D6319 FDA 21CFR 177.2600 GB 4806.11 EN 1186

Industrial Grade Disposable Nitrile Gloves

Features

- Made of 100%high quality NBR, non-toxic and odorless
- No allergenic protein sources, lowering the risk of allergies
- Thickened design for excellent strength, durability,and impermeability
- Good resistance to oiliness and foulness, acid, alkali and chemicals
- Soft fit, tensile and tear resistant, durable, sensitive and simple to use
- Finger texture/full texture for enhanced anti-slip performance
- Basic anti-static performance

Application

Landscaping and gardening, equipment maintenance, industrial manufacturing, renovation and construction, logistics and other industrial industries

Specifications

| Material | Texture | Specification | Size | Weight | Length | Packaging |
|----------|----------------------------|---------------|--------|------------|-------------|-------------------------|
| Nitrile | Finger texture/full exture | Powder-free | XS-XXL | 3.0g-10.5g | 240mm-300mm | 100 pcs×10 boxes/carton |

Certification

EN 455 EN 374 FDA21CFR177:2600

Industrial Grade Disposable Nitrile Gloves (Diamond Textured)

Features

- Diamond texture for increased friction and good grip performance
- Made of 100%high quality NBR, non-toxic and odorless
- No allergenic protein sources, lowering the risk of allergies
- Orange/black colors for high visibility and easy identification
- Thickened design for excellent strength, durability and impermeability
- Good resistance to oiliness and foulness, acid, alkali and chemicals
- Soft fit, tensile and tear resistant, durable, sensitive and simple to use
- Basic anti-static performance

Application

Crafting, maintenance, renovation, construction, industrial manufacturing, logistics and other light and heavy industrial industries

Specifications

| Material | Texture | Specification | Size | Weight | Length | Packaging |
|----------|-----------------|---------------|--------|--------|--------|------------------------|
| Nitrile | Diamond texture | Powder-free | XS-XXL | 8.0g | 240mm | 100pcs×10 boxes/carton |

Certification

EN 455 EN 374 FDA21 CFR177:2600 EN1186

Disposable Clean Room Gloves

Features

- Double vacuum packaging to ensure cleanliness
- Products for use in Class 10, Class 100 and Class 1000 clean rooms
- Excellent tensile strength, elongation and conformability
- Finger texture forenhanced anti-slip performance
- Basic anti-static performance

Application

Aerospace, electronic equipment processing, precision micromachining, microbiological engineering, and other clean production and operation industries

Specifications

| Material | Texture | Specification | Size | Weight | Length | Packaging |
|----------|----------------|---------------|------|------------|--------------|------------------------|
| Nitrile | Finger texture | Powder-free | S-XL | 4.5g, 5.8g | 240mm, 300mm | 50 pcs/bag, 100pcs/bag |

Medical Grade Disposable Vinyl Examination Gloves

Features

- Made of vinyl, non-toxic and safe to use
- No allergenic protein sources, lowering the risk of allergies
- Good resistance to bacterial penetration, acid, alkali, grease and chemicals
- Excellent tensile strength, elongation and conformability
- Flexible, sensitive and simple to use
- Basic anti-static performance

Application

Medical care, medical testing, dental clinics, beauty institutions, veterinary hospitals and other medical industries

Specifications

| Material | Specification | Size | Weight | Length | Packaging |
|----------|---------------|------|----------|--------|-------------------------|
| Vinyl | Powder-free | S-XL | 4.0-5.0g | 240mm | 100 pcs×10 boxes/carton |

Certification

EN 455 ASTM D6319 FDA21 CFR175:300

Food Grade Disposable Vinyl Gloves

Features

- Certified for food safety in accordance with national standards
- Made of vinyl, non-toxic and safe to use
- No allergenic protein sources, lowering the risk of allergies
- Good resistance to bacterial penetration, acid, alkali, grease, and chemicals
- Excellent tensile strength, elongation and conformability
- Flexible, sensitive and simple to use
- Basic anti-static performance

Application

Fruit and vegetable washing, food processing, cooking, food and beverage production and other catering industries

Specifications

| Material | Surface | Size | Weight | Length | Packaging |
|----------|-------------|------|-----------|--------|-------------------------|
| Vinyl | Powder-free | S-XL | 4.0g-5.0g | 240mm | 100 pcs×10 boxes/carton |

Industrial Grade Disposable Vinyl Gloves

Features

- Made of vinyl, non-toxic and safe to use
- No allergenic protein sources, lowering the risk of allergies
- Good resistance to oiliness and foulness, with excellent strength, durability and impermeability
- Excellent tensile strength, elongation and conformability
- Flexible sensitive and simple to use
- Basic anti-static performance

Application

Landscaping and gardening, equipment maintenance, industrial manufacturing, renovation and construction, logistics and other industrial industries

Specifications

| | | Size | Weight | Length | Packaging |
|-------|-------------|------|-----------|--------|------------------------|
| Vinyl | Powder-free | S-XL | 4.0g-5.0g | 240mm | 100pcs×10 boxes/carton |

Certification

EN455 EN 374 FDA 21 CFR175:300

Disposable Sterilized Latex Surgical Gloves

Features

- Made of quality natural rubber latex, non-toxic, environmentally friendly and biodegradable
- Sterilized by ethylene oxide, safe to use
- Curved and decompressive design to reduce fatigue during use
- Excellent tensile strength, elongation and conformability
- Anti-slip texture surface design to effectively increase friction

Application

Specifically designed for medical procedures such as hospital and veterinary hospital surgeries

Specifications

| Material | Specification | Size | |
|----------|-----------------------------------|------------------------|-----------------------------|
| Latex | partially textured Powder-free | 6, 6.5, 7, 7.5, 8, 8.5 | 2pcs×50 pairs×8boxes/carton |

**FACE
PROTECTION>>**

Disposable Protective Mask

Features

- Bacteria filtration efficiency \geq 95%
- Made of quality, soft and skin-friendly non-woven fabric
- Individually packaged for cleanliness and portability
- Easily formable nose strip with good sealing performance that provides enhanced protection

Application

Provide a physical barrier, to a certain extent, to prevent direct contact with pathogens, microorganisms and particulate matters

Specifications

| Material | Size | Packaging |
|--|---------------------|---------------------------------|
| Spunbond non-woven fabric, and polypropylene melt blown non-woven fabric | 175mm \times 95mm | 50 pcs \times 20 boxes/carton |

Test Reports

GB/T 32610-2016

KN95 Protective Mask

Features

- Filtration of more than 95% of particles >0.3µm in diameter
- Made of quality, soft and skin-friendly non-woven fabric
- Individually packaged for cleanliness and portability
- Easily formable nose strip with good sealing performance that provides enhanced protection

Application

Filter airborne particles, capture droplets, liquids, secretions and other particles, and protect against airborne respiratory infectious diseases

Specifications

| Material | Size | Packaging |
|--|-------------|------------------------|
| Spunbond non-woven fabric, and polypropylene melt blown non-woven fabric | 160mm×105mm | 50 pcs×20 boxes/carton |
