## DTG DIRECT TO GARMENT

Digital printing technique for 100% cotton textile products. The logo is placed directly onto the fabric through a printer.

## TRD DIGITAL TRANSFER

The logo is printed directly from a printer onto paper, which is then applied using pressure and heat. Full color printing is possible.

## FIR FIRING

The logo is placed on the product through the transfer technique using special inks. The product is then placed in an oven (firing) to be baked at low temperature (personalisation up to 10 colours) or at high temperature (personalisation in black and/or white).

## LSR LASER

Use of a high-precision laser beam, allowing for low-relief engraving. This laser can be fibre optic, suitable for metals, or CO2, suitable for wood and cork, or UV, suitable for glass.

## LAS CIRCULAR LASER

Use of a high precision laser beam optimised for application on curved surfaces.

## SCR SCREEN PRINTING

Printing a logo on a photolitho, which is passed onto a wired screen using ultraviolet light. The ink is applied using a squeegee and must be dried.

## TRS TRANSFER

Printing the logo onto paper through a screen, which is then applied to the product using pressure and heat. Recommended for non-flat products such as backpacks.

## SRC CIRCULAR SCREEN PRINTING

Process identical to screen printing but orientated for printing on circular products, such as ball pens.

## SUB SUBLIMATION

Printing a logo on a paper using a printer with sublimation inks. The ink is transferred to the product by pressure and heat.

## STI STICKERS

Printing stickers on white, silver or gold paper with a great variety of sizes and shapes.

## EDB EMBROIDERY

Technique that allows customisation on different types of fabric with great quality and perfection.

## ETD 3D EMBROIDERY

A technique that allows you to personalise different types of fabric, achieve a high quality finish and achieve perfection with three-dimensional personalisation in relief.

**SND** SANDBLASTING

Printing of the logo through sandblast against a surface at high speed.

**HTS** HOT STAMPING

Reproduction of logos through a hot press on leather products or imitation leather. A metallic colour (gold or silver) can also be applied on the mould.

**DOM** DOMING

Application of a layer of resin (epoxy) on printed paper. The product must be dried at high temperature to form a protective and resistant layer giving it a 3D effect.

**DGL** DIGITAL PRINTING

Digital printing consists of printing paper, with photographic quality. This technique is widely used for labels or pins.

**HDG** HYDROGLAZE

Spraying organic colours on the external surface of white porcelain mugs. After baking, the mug is ready for other printing techniques, such as firing or sandblasting.
