## WHO WE ARE

At SABAR HANDCRAFT we are committed to providing eco-friendly and ethical products that help to create a better world. We believe that by choosing sustainable and biodegradable materials, we can minimize our impact on the environment while still providing high-quality, functional and beautiful products.

Our hand-woven baskets are made by over 5,000 skilled female artisans in the northern part of Ghana, with traditional techniques passed down through generations. We work directly with these artisans to ensure fair wages and safe working conditions, supporting local communities and preserving traditional crafts.

Our baskets are made from natural and renewable materials, such as savannah grass, and raffia that are biodegradable and compostable. These materials are harvested in a sustainable way, ensuring that we are not depleting natural resources or contributing to environmental degradation.

In addition to being sustainable and biodegradable, our baskets are also reusable. They are perfect for a variety of uses, from storing blankets and toys to carrying groceries or serving as decorative pieces in your home. By using our baskets, you are helping to reduce waste and promote a more sustainable lifestyle.

At SABAR HANDCRAFT, we are passionate about creating beautiful and functional products that are also good for the planet. We believe that by making responsible choices, we can help to create a more sustainable future for all. Thank you for supporting our mission and choosing to shop sustainably.
