

WALKLAKE ROBOT

Effectively help prevent and control epidemic and other infectious diseases from entering your school

30,000+ Schools	24,000,000+ Screenings	1.3 Billion+ Records
<i>The choice of 30,000+ well known kindergartens and elementary schools</i>	<i>Providing health screening for 6,000,000+ children every day, supporting 24 million+ inspections.</i>	<i>Accumulated over 1.3 billion+ health screening – Massive data retention capability to facilitate the analysis of health data.</i>

ABSTRACT

The WALKLAKE ROBOT is an artificial intelligence device that is capable of assisting in health screening for children (best age between 3~10 years old). It can effectively help to prevent and control epidemic and other infectious diseases from entering schools and other facilities that are being used by children. The use of this device helps to ensure good environmental health.

The WALKLAKE ROBOT boast the Tuppence Artificial Intelligence (AI) algorithm which focuses on children's health screening, and only need one step to complete a child abnormal characteristics screening. It assists the school to screen out students who are potential epidemic and other infectious disease risk which should be further confirmed by the school nurse when entering the school.

Supports both Normal Situations and Epidemic Situations

During normal period, the advanced health screening mode helps in the screening of epidemic disease risk more comprehensively and carefully. The inspection checklist includes temperature, mouth, hands and eyes, which could have micro abnormal symptoms, such as red rash, herpes, redness and temperature abnormality, etc. The entire screening process can be completed automatically in about three (3) seconds.

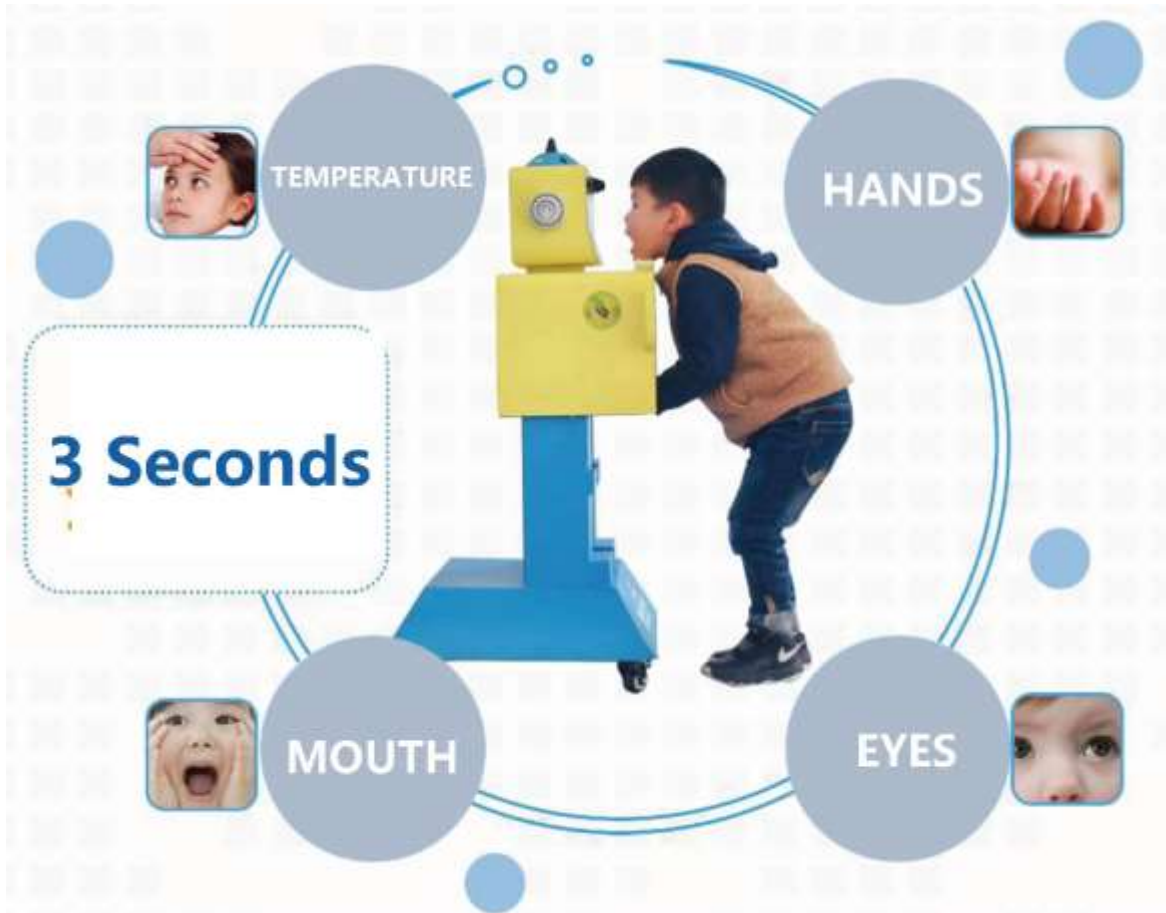

During an epidemic prevention and control period, the mask mode and wrist temperature mode can help schools screen the temperature quickly (within one (1) second) without contact, which is safer and more efficient.

Why do children need health screening before entering school?

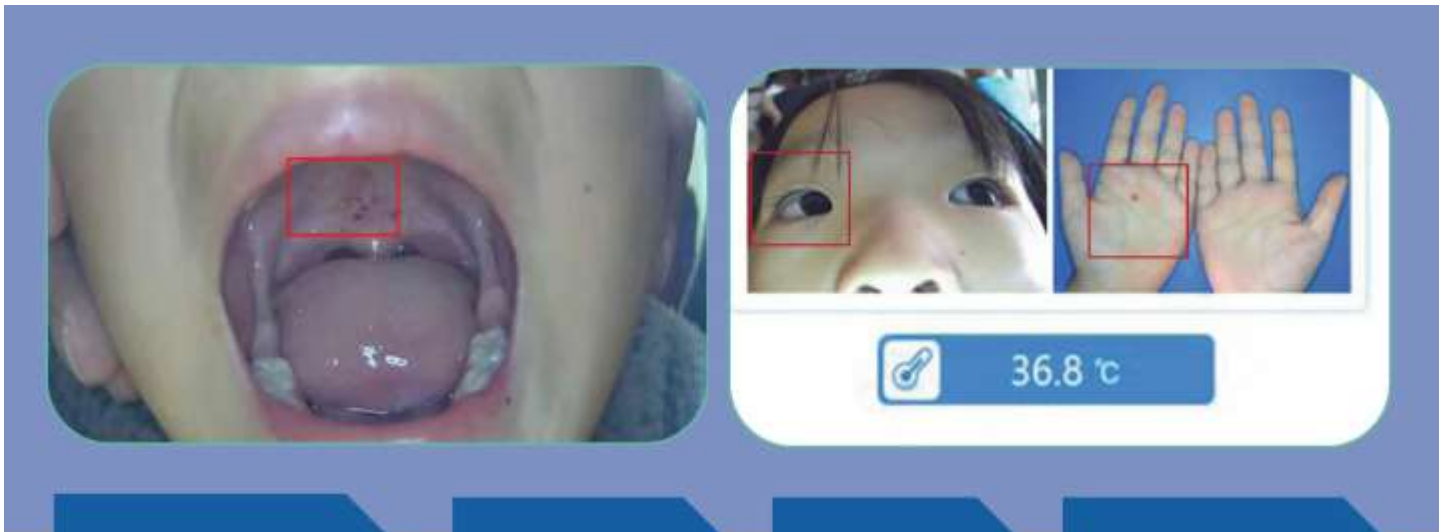

- 1. Children are prone to infectious diseases:*** Common epidemic diseases, such as hand-foot-mouth disease, herpangina, pinkeye, and influenza, are highly infectious. These diseases usually have the characteristics of abnormal body temperature, rash on palate, red rash on hands and eye redness.
- 2. High risk of infection due to intensive activities at school:*** Since schools and kindergartens are crowded with children, the risk of mutual infection of such diseases is higher.
- 3. Inspect the abnormal risks so as to ensure good environmental health:*** Therefore, it is of great significance to establish a healthier school environment by screening the abnormal physical signs and conducting epidemic and infectious disease risk screening on children.

NOTE: A number of countries to include China have made it a government policy, which requires all kindergartens to have morning inspection before each child can enter the classroom (kindergarten & elementary). The intent is to effectively control the spreading of common diseases among children at school.

SCREENING DURING NORMAL SITUATION

One step to complete the child's abnormal characteristics screening of temperature, mouth, hands and eyes in three seconds automatically.

The interface displays four inspection areas: Mouth, Eyes, Hands, and Temperature. Each area has a corresponding image and a list of symptoms.

Mouth	Eyes	Hands	Temperature
<ul style="list-style-type: none">• Rash on palate• Oral herpes• Throat redness• Cavities	<ul style="list-style-type: none">• Conjunctival redness	<ul style="list-style-type: none">• Red rash• Herpes• Nails• Wounds	<ul style="list-style-type: none">• High fever• Low fever

Each inspection can screen micro abnormal symptoms on the human body rapidly, such as red rash, herpes, redness, and temperature abnormality.

SCREENING DURING EPIDEMIC SITUATION

MASK MODE:

- *Forehead temperature measurement*
- *Child wears mask*
- *Safe for all*

The child being screened / measured does not need to take off the mask for inspection as the robot measures the forehead temperature.

WRIST TEMPERATURE MODE:

- *Wrist temperature measurement*
- *Child does not come in contact with the device - Contactless*
- *Provide result in one (1) second.*

CONTACT LESS: *Screen the wrist temperature automatically without contact.*

MULTI-FUNCTION CAPABILITY

- *High fidelity loudspeaker box*
- *Capability to upload class content: (stories, lessons etc...)*
- *The device has the capability to tell stories and play music.*

AVAILABLE IN TWO (2) COLORS

Product Name	LCD touch screen	Detection channel	Intelligent health screening items				Automatic health screening	Health screening efficiency	Fun learning	Charge portability

TECHNICAL INFORMATION

TUPPENCE ARTIFICIAL INTELLIGENCE (AI) ***(Fast recognition of minor anomalies)***

Ultra high accuracy

It can identify minor anomalies with an accuracy of 99.7%.

Super fast

The accuracy and speed of the deep learning algorithm can be increased by up to 20% compared with ordinary algorithm.

Neural network engine

Provide powerful driving force for site detection, physical sign recognition and more functions

Billions of data

100 million-level data volume, algorithm self-learning, fast self-iteration

Ultra high-performance experience

Precise Infrared Technology, temperature measurement module

Fast response, 50 ° viewing angle, ± 0.01 ° C accuracy, 0.2 second reading rate.

4 sets of industrial cameras

Higher resolution of health screening images of hands, mouth and eyes

Intel i5 dual core processor

Strong processing power, fast operation speed, real-time feedback result of local algorithm, no network transmission delay

Light compensation system

Constant light effect can be achieved by intelligent algorithm bionics

SAFETY AND EXPERIENCE

Integrated care in every component

01 Human safety voltage

Equivalent to a tablet computer, safe to use without worries

02 Anti-electromagnetic interference

Special distribution equipment materials, approved by 3C certification in China and CE certification in EU

03 Aviation standard plug

Aviation level plug is used in the interior, with more guaranteed quality

04 Children and environmental protection materials

Nontoxic, safe and non sensitizing;
the machine is made of internationally certified children's health material which meets the national standards.

ISO9001 certification

CCC certification in China

CE certification in EU

USE CASES

This device is the first choice for China's provincial and municipal public schools.

NAMED INSTITUTIONS:

Song Qingling, Huijia, Dafengche, Hoing, Combaby, Cradle Edu, Haihuayidun, Montessori, Xiaotaiyang, Kid Castle, Gold Apple, Xiaohafo, RYB Education, Jinghua Tree Nature.....

Provincial and regional government schools, foreign language schools, central schools, university affiliated kindergartens, PLA university kindergarten, direct affiliated kindergartens.

CERTIFICATIONS

- *China CCC Certification*
- *EU CE Certification*
- *20 National Patents*
- *Science and Technology Leader*
- *Listed in Suzhou Equity Trading Center*

IMPORTANT NOTE

- This product **cannot** detect Covid-19 ;
- This product is **not** a medical equipment ;
- This product is **only** used for auxiliary school inspection to screen abnormal signs, and no medical diagnosis can be made.
- Warnings should be **further confirmed** by the school nurse.
- It is recommended to use the robot in **indoor environment**

The first-choice brand for school health entry

More than 30,000 Walklake cooperative schools

- ✓ Effective epidemic prevention measures
- ✓ Improvement of the ability of the schools on public health protection
- ✓ Technology-driven efficiency
- ✓ Improvement of parents' satisfaction
- ✓ Building a high-quality school/campus
- ✓ Boosting enrollment
- ✓ School Branding

OTHER FREEWORLD INVENTORY LIQUIDATION – PPE CLOSEOUTS

PPE products listed below are available for immediate shipment / delivery. Interested parties are encouraged to contact us via email: bizdev@freeworldbrand.com for pricing and other related information. NOTE: Principals Only.

FWI LIQUIDATION MARKETPLACE AFFILIATE PROGRAM

Become an **ONLINE INVENTORY LIQUIDATOR** using the FWI link based model which enable you to create links to any product within the FWI Marketplace. You have the ability to share these links with potential customers via email, social media and other digital mediums. You will **earn between two to five percent (2% - 5%) commission on the sales of products** which are sold based on your efforts. These links contains identifiers that will ensure that you receive compensation when a purchase is made on a linked item containing your identifier. There are no charges associated with this groundbreaking business opportunity, your participation will not cost you a dime, it is completely free of charge.

"EXPOSE YOUR PRODUCTS TO QUALIFIED BUYERS AND GAIN MORE SALES"

Become a **SUPPLIER** to FreeWorldImports. We are a **INVENTORY LIQUIDATION MARKETPLACE** with a growing customer base to include **domestic and international traders, merchants, governments and others** who have been working with us based on the long lasting relationships that we have cemented with them over the years. We are in the process of growing our supplier base and is constantly reaching out to **reputable supplier organizations** to join our supplier network.

As a supplier to our marketplace, you will be afforded the following:

1. Access to FreeWorldImports **global customer base**.
2. **Increased reach** - showcase your products within the FreeWorldImports member network.
3. **Access to the FreeWorldImports Supplier Portal** which provides the following:
 - Capability to **upload and list products** that are available for sale within the marketplace
 - **Monitor Earnings** - (Daily, Weekly, Monthly and Yearly sales activities)
 - **Collaborate** with FreeWorldImports Affiliates and Agents
 - Utilize FreeWorldImports link based engine to **socialize your listed products** via Social Media and other digital mediums.
4. **Get paid** fast for listed products that have been sold within the marketplace. Funds will be credited to your bank account within hours after a transaction is completed as opposed to days.
